DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on July 07, 2003 has been entered.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-15 and 21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 09/928,461. Although the conflicting claims are not identical, they are not patentably distinct from each other because instant claims contain the subject matter that is broader in scope than the claims of the copending Application, rendering them obvious over each other.

Art Unit: 1711

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Independent claims 1, 7, 14, and 19 of the copending Application teach all of the limitations recited in independent claims 1 and 10 in the presently claimed invention. The claims in the copending application further include a chimney with a top and a bottom, and a transformer sized to produce excess heat, which causes air to rise in the chimney; making them narrower in scope than the instant claims. Therefore, the scope of the instant claims encompasses that of the claims of the copending application, rendering them obvious over each other.

Independent claim 16 of the presently claimed invention includes a chimney with a top and a bottom, a heater means for allowing visible light to escape from the chimney, and a UV light of wavelength shorter than 387 nm; making the instant claim narrower in scope than the claims of the copending Application. Hence, the scope of the claims of the copending Application encompasses that of the instant claims, rendering them obvious over each other.
